

Tables and tallies

Start with some practice by copying these three tallies and then write the total as a number.

Example	Draw the same tally here	Total
 		
 		

Roll one dice at a time and record your data as a tally in the table below.

Number rolled	Number of instances for each number	Total
1		
2		
3		
4		
5		
6		

Now roll two dice and record your data as a combined total using tallies in the table below.

Combined number rolled	Number of instances for each combined roll. For example, $2 + 3 = 5$ so place one dash in the 5 box below.	Total
2		
3		
4		
5		
6		
7		
8		
9		
10		
11		
12
